

About us: Real progress is what drives us

As a partner for the automotive and commercial vehicles industry around the world, we are continually driving innovations in mobility. Our commitment has always been: “Lower consumption, lower emissions, higher performance.” To do this, we concentrate completely on our core competencies: the development and production of components for optimizing engine and transmission applications, the efficient thermal management for electric and hybrid vehicles, and products for hydrogen-powered fuel cell systems.

With production and development locations in Europe, North America, and Asia, we are where our customers need us.
